Space Campus Noordwijk: A new opportunity for Space Business

National-regional-local governments have joined forces to develop Space Campus Noordwijk

Parties aim to modernize the ESTEC site and develop the Space Campus Noordwijk through a coordinated use of financial resources and administrative power in order to:

- strengthen the interaction between ESA-ESTEC and its environment
- create more innovative business and technological development around ESA-ESTEC
- strengthen the economic appeal of the region

Governments will invest over € 25 million to stimulate private investments

With the use of public funds, the National government, the Province of Zuid-Holland and the Municipality of Noordwijk aim to mobilize private parties for financing the development of Space Campus Noordwijk

Planned new facilities on Space Campus

- **International Meeting Facility:** to be built on the ESTEC site and also available for Space Campus Noordwijk companies and institutes.
- **SCN AVATAR:** Virtual and Augmented Reality for Space. AVATAR is a knowledge and R&D center that is focusing on the development and use of virtual reality (VR) and augmented reality (AR). The Lab is focused on optimizing engineering processes.
- **NEOC:** groundstation for Earth Observation Data Applications. NEOC is a not-for-profit foundation and an open innovation network for geodata based innovation. NEOC is focused on education, exploration & creation with remote sensing technologies. NEOC exchanges knowledge and ideas, fosters entrepreneurship and collaborates to develop new initiatives.

Planned new facilities on Space Campus

- **Test centre for small satellites:** One of the crucial elements of success in a small satellite program, is the Assembly Integration and Testing (AIT) phase. Dedicated specialized test facilities are in the planning phase.
- **Maker Space** (Fab-Lab) will be realized on space campus (an ESTEC initiative)
- **Space Campus organization**, with main tasks: daily support of companies and institutes on the campus, community building, marketing and (international) acquisition, organizing meetings on innovation

Multiple business locations

at the Space Business Park

- Start-up and scale-up workspace at Space Business Innovation Centre (SBIC) Noordwijk
- Lease options at existing buildings
- Future building on the campus: multi purpose building in preparation
