

EO4GEO - Mazovia

### **Masovian Spatial Information System**

## Standardized Practices for Monitoring Landscape Values and Natural Capital Assessment

### **GOALS:**

- Development of customized indicators
  integrating EO and non-EO datasets into a
  framework that can effectively characterize
  priority issues associated with natural capital
  assessment and support the integration of this
  methodology into regional working practices.
- Testing the product in the Mazovia region and extend monitoring and assessment approach to the entire Polish territory based on the results and feedback.

# Business Incubator of the European Space Agency In Poland

#### **GOALS:**

- Incubate 25 start-ups for the period of 5 years.
- Ensure over 80 hours of business, law and technological support for one start-up.
- Boost cooperation with universities in order to interest students and graduates in the subject of entrepreneurship for the benefit of the space sector.

## 2021 EO4GEO workshop in Poland

### **EXPECTATIONS:**

- Interact with students, researchers and entrepreneurs.
- Collect ideas and examples of earth observation based tools and material.
- Find new opportunities for implementation.
- Interact with EO4GEO experts and establish relationships.
