**Outlook and Opportunities for partners
2021-2023**

- The exhibition would be inaugurated in iconic places such as United Nations Headquarters in New York in July 2021 (tbc) with a planning in other international emblematic places in Europe.
- Space for a Sustainable World will travel internationally during 3 years with the help of our partners and with our experience in touring exhibitions.
- We will target international events, universities, municipalities, festivals, museums... as potential hosts for the exhibition.
- Media and PR will be organised and will benefit to partners.
- High-quality content can be leveraged by partners in several ways : as a ready-made exhibit, as a series of portraits...

scelte a Parigi

A woman with dark hair, wearing a white long-sleeved shirt and a black headband, is sitting on the floor next to a large, gold-colored satellite dish antenna. She is looking towards the camera. The background shows a room with white walls and a large window.

The screenshot shows the L'Obs Sciences website. At the top, there's a navigation bar with the L'Obs Sciences logo and a search bar. Below the navigation bar, there's a main header with the text "PRG105. Les congarantes de l'espace". The main content area features a large video player showing two astronauts in white space suits standing in a narrow corridor, likely inside a space station. The video player has a play button and a progress bar. To the right of the video player, there's a sidebar with a list of related articles and a "Recommandé" section.

À Paris, une exposition met à l'honneur les "Formes et l'État de l'espace". Parmi elles, la franco-italienne Francesco Albini, jeune sculpteur contemporain à l'Observatoire de Paris et à l'Université Pierre et Marie Curie. France 24 le rencontre.
