

Lincoln College Group 2021 – the UK National Space Academy

Professor Anu Ojha OBE

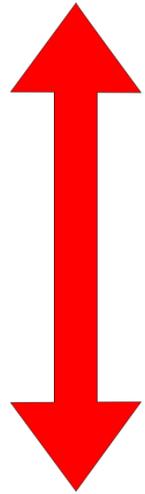

- Director (NSC Discovery), National Space Centre
- Department of Physics and Astronomy, University of Leicester
- STFC Council
- ESA Human Spaceflight and Exploration Science Advisory Committee

Skills development in a strategic sustainable framework – the NSA

Education
and Skills

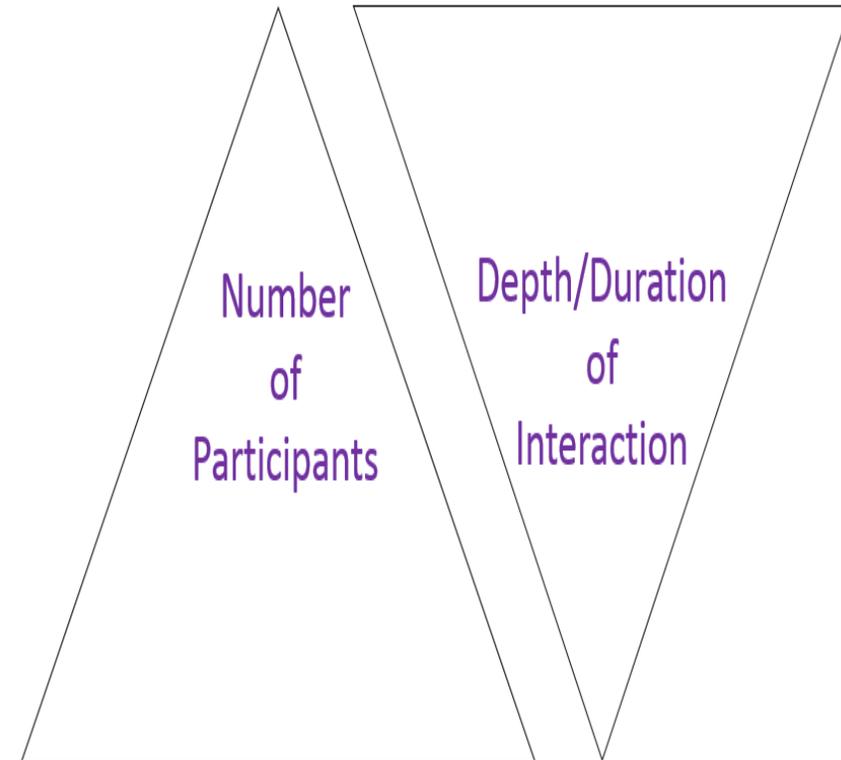

Inspiration

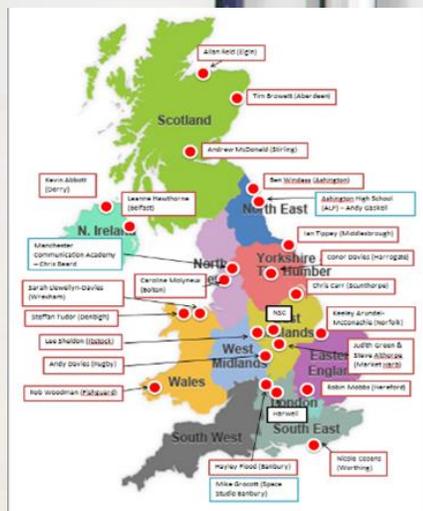

Undergraduate level programmes
for space industry employees –
**HIGHER APPRENTICESHIPS IN SPACE
SECTOR**

Secondary school GCSE and A Level
programmes (full-time) – Space
Engineering, Space Studio Schools

Secondary school support
programmes (ages 11-19) – Science,
Technology, Engineering,
Mathematics - students and
teachers

Primary school support programmes

Boosting student attainment in core academic examination subjects
Enhancing teacher effectiveness through teacher training programmes
Giving young people advice on navigating pathways into science and engineering

The NSA since 2011

- Student masterclasses (secondary) – 57 000
- Continuing Professional Development for Teachers -6000+ UK teachers and 1000+ international teachers
- Careers conferences for high school and undergraduate students
- International contract work for ESA Education, CNES, Norwegian Space Centre, European Union, UAE Space Agency, China (various)
- Developing in-flight experiments for ESA astronauts – Cristoforetti, Peake, Pesquet
- 250+ full-time high school students on Space Engineering and Space Studio School courses
- Skills/Training and exploration lead for UK-China space collaboration and UK strategic support for Gulf states' space sector skills development programmes

Frequency (Hz)	Dragon Pressurized Cargo Launch Vibration MPE - All Events (Rev11) - All Axes [g ² /Hz]
20	0.02
200	0.02
2000	0.001
GRMS	3.2
Duration	60 sec/axis

Random Vibration (LAUNCH – All Events)

Notes:

1. This random vibration environment applies for items hard-mounted to racks. Items soft-mounted with straps and/or foam will have a lower environment.
2. Duration covers liftoff, ascent, Mvac burn, and reentry (abort).

Figure 1: Random Vibration Specification Used in Testing

Figure 7: CTB Mounting Hardware Attached to Fixture on Slip Table (X axis configuration)

Figure 8: CTB Attached To Fixture on Slip Table (X axis configuration)

FLIGHT SAFETY CERTIFICATE

I. Certificate Number — Unique alpha-numeric identifier provided by the Cargo Item Provider. SPX7/ESA/TR10P1/EPOPk-CVD-1

II. Cargo Item Provider — The Cargo Item Provider is either the IP which owns the cargo or is the IP sponsoring the cargo on behalf of its nationals which own the hardware.
 NASA FSA ESA JAXA CSA

III. Cargo Identification — Official nomenclature and part number of the cargo item.

Cargo Item Name (Use an attachment for more items)	Part Number / Configuration Item No.
For Classroom Video Demonstrations Items	<input type="checkbox"/>
see attached item list	<input type="checkbox"/>
	<input type="checkbox"/>

IV. Transportation Safety Requirements — The check marks below define the transportation vehicle(s) which will be used for the upload/download of the cargo item(s) together with the Process and Technical Safety Requirements which have been made applicable to the subject cargo item(s).

Transport Vehicle	Process Requirements	Launch Requirements	Return <input checked="" type="checkbox"/> Disposal Req.
