

Education activities of POLSA

Kinga Gruszecka,
Acting Head of Education Department

Warszawa, Oct., 22nd

What we do?

International
Cooperation

- **International Cooperation**
 - POLSA coordinates the participation of Polish representatives in EU and ESA and other international entities programs.

Security
and Defense

- **Security and Defense**
 - The priority task of the Polish Space Agency is to increase Polish defense capabilities through the use of satellite systems.

Administrative
Authorities

- **Data for administrative authorities**
 - POLSA is to facilitate and enable the country administration use of products of satellite technology such as Earth observation, satellite navigation or telecommunications.

Space
Industry

- **Space Industry**
 - POLSA works on developing partnerships between Polish industry and research entities by organizing briefings etc. on the state of development of technological domains of ESA.

Research
& Development

- **Research & Development**
 - POLSA supports Polish scientific institutions conducting R & D in the areas of raising funds for scientific and industrial research and development work and technologies.

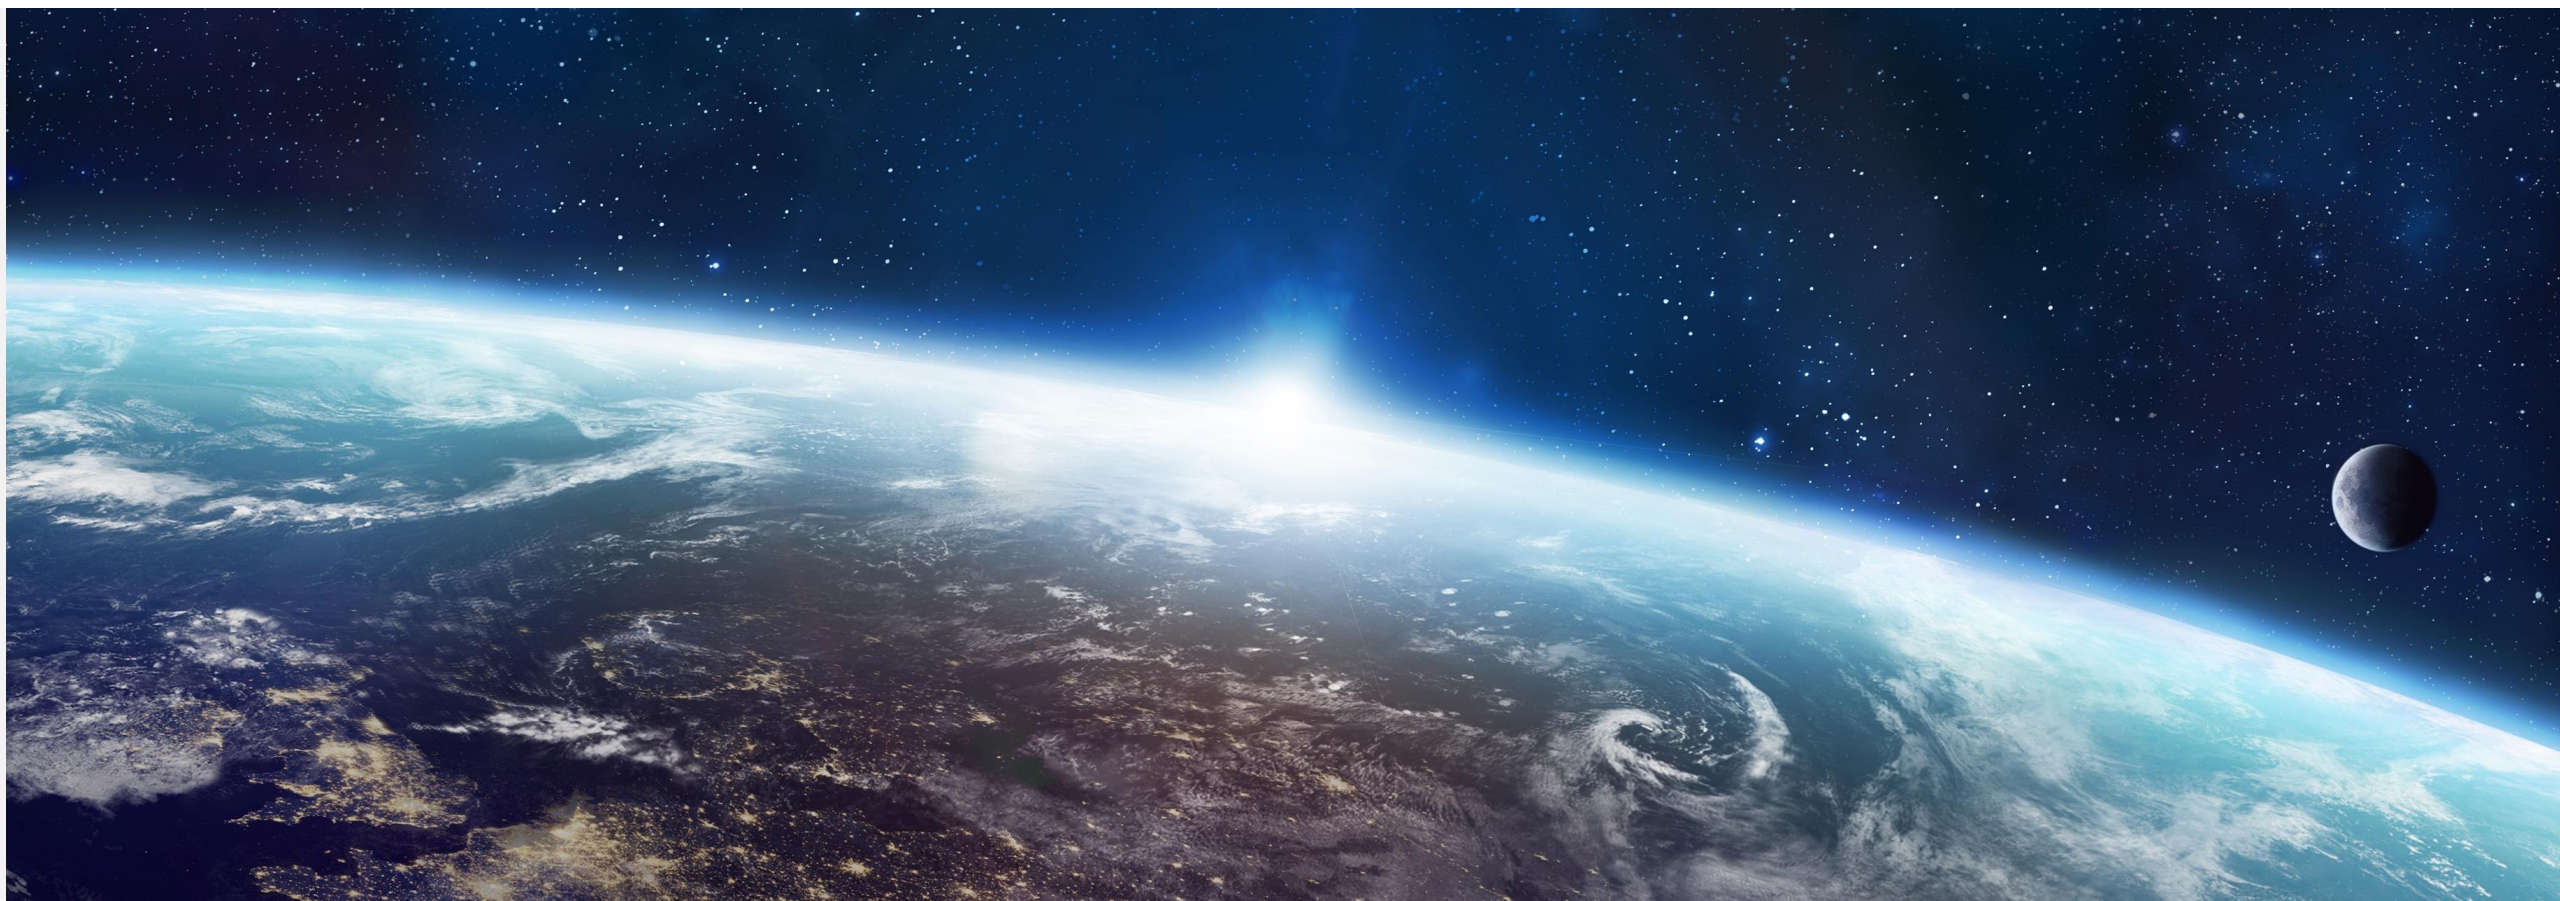

Education

- **Education**
 - POLSA conducts educational activities in space technology, space career, and the participation of Polish entities in space missions and experiments, addressed to all age groups.

Education? Yes, please.

Research first

Are students ready to work in space sector?

- Excelent detailed & theoretical knowledge
- Lack of experience
- Lack of understanding of project lifecycle
- Poor language skills
- Lack of ability to work independently

Not only for students

Project ended in March 2021. POLSA worked on:

- E-learning platform
- Webinars & stationary learning
- Handbook for public administration

What's next?

- GovSatCom on-line training thanks' to ENTRUSTED project efforts;
- More trainings for public administration working with EO (stationary);
- Conferences enabling exchange of experience and knowledge (not only about EO).

Polish Space
Agency

Thank you!
