

Space 4 Critical Infrastructure

Putting the EC proposal into action

24 May 2022 / 10:00–11:00 AM CEST

This third session of Space 4 Critical Infrastructure invites the European Commission to share opportunities and views for the green and digital transition in the construction sector. Two examples will then be given of cooperative projects in the sector of infrastructure. One national project related to the use of satellite technology for monitoring the stability and security of infrastructure, and one European project on innovative EGNSS applications for roads and railways.

Agenda

- Welcome and introduction by organisers
- EU policies for the green transition of construction, Philippe Moseley, European Commission
- The Enterprises Network "MILLE INFRASTRUTTURE": monitoring of infrastructures supported by satellite applications and innovative solutions, Raffaele Santangelo, Geocart S.p.A.
- EGNSS applications transforming roads and railways into a synergic ecosystem sharing digital infrastructures, safety and certification processes to lower energy consumption and pollution, Arianna Persia, HELMET project
- Q&A and closing remarks
