

Space 4 Critical Infrastructure

Public Administration

23 June 2022 | 10:00–11:00 AM CEST

Large-scale risks such as accidents, natural disasters, and antagonistic threats, may disrupt the provision of essential services and undermine confidence in critical entities, as well as in the authorities responsible for their oversight and for keeping the population safe and secure. During this fourth webinar, several examples will be presented on how space can boost the preparedness of public administrations in this regard.

Agenda

- Welcome and introduction by organisers
- EUSPA on secure communication GOVSATCOM, Valeria Catalano, Market Segment Leader for Critical Infrastructure
