

Space 4 Critical Infrastructure

Banking and Financial Market Infrastructures

13 September 2022 | 10:00–11:00 AM CEST

This thematic session of “Space 4 Critical Infrastructures” revolves around banking and financial entities and how to manage operational risks and ensure business continuity. Space technology can support the digitalisation and greening of the financial sector. Satellite applications can contribute in credit, payment and insurance processes, and in particular Global Navigation Satellite Systems (GNSS), to provide accurate measurements of time and synchronisation.

Agenda

- Welcome and introduction by organisers
- Sustainable finance and Space, Claire Jolly, Head of Innovation Policies for Space and Oceans Unit at OECD
- EU Space programme for Finance and insurance market, Valeria Catalano, EUSPA Market Development Officer
- Green Finance and Climate Risks, ESA Commercialisation Gateway
- Q&A and closing remarks
