

Space 4 Critical Infrastructure

Energy & Transport

27 October 2022 | 10:00–11:00 AM CET

For its third thematic session, the “Space 4 Critical Infrastructures” series shifts towards energy and transport. The green and digital transition of transport and energy distribution networks stands high on the EU political agenda. This session will gather examples of satellite solutions for the maintenance and monitoring of road and railway infrastructure, as well as for safe transport and distribution of energy.

Agenda

- Welcome and introduction by organisers
- Energy asset observation, Antoine Halff, Co-founder Kayrros
- Statement of the MEP Lukas Mandl, rapporteur of the Committee on Foreign Affairs
- Security of distributed renewable energy sources, Albert David Lewandowski, Magellanic Space
- Q&A and closing remarks
