HORIZON INTELLIGENCE

HORIZON API

INTELLIGENCE GATHERING

Automated AI crawling of 7K+ sources:

- International & Local media
- Social media: (e.g. Twitter, Facebook, Telegram, etc.)
- Governmental websites
- Possibility to add sources
- Sources are classified by country, language, type and credibility (work in progress)

AI PROCESSING

Our AI software "Lookout":

- Selects relevant information
- Translates them into English
- Classifies them by topic, location and impact
- Sends a draft alert to our analysts for verification and to the platform as an "early warning" alert (avg 5 minutes delay)

HUMAN VERIFCATION

Our team of analysts:

- Verifies the information based on our client's needs & requirements in order to provide a customised approach (avg. 15-20 minutes delay)

DISSEMINATION

Alerts are disseminated via the Platform and APIs:

- **Platform:** Horizon+ displays both early warning alerts generated by the AI, and verified ones by Hozint's analysts.
- **APIs:** we provide APIs for both human-verified alerts (Horizon) and AI-generated ones (Lookout)

LOOKOUT API

The space connection

Eyes from the Sky...
...Ears from the ground
