# Steps towards the programme's objective

Projects intervention scope

Levels of learning

Individual learning refers to the increased professional capacity of the staff members (individuals) of organisations involved in interregional cooperation Organisational activities. learning builds on individual learning and when the occurs organisation itself has increased its capacity.

PLP intervention scope

### SAT.SDI.F.A.CT.ION

Satellite data and Spatial Data Infrastructures for an evidence-based regional governance

The SATSDIFACTION project aims at promoting the exchange and transfer of experiences related to the use of Satellite Data in local and regional Spatial Data Infrastructures as a mean to improve the performance of regional policy instruments, eventually leading to a better, evidence-based governance of the regional territory.

#### **Partners**

Veneto Region *	IT
NEREUS (Advisory partner)	BE
Podkarpackie Region *	PL
Azores Region *	PT
Sviluppo Basilicata (Basilicata) *	IT
ISSeP (Wallonia Region) *	BE
Riga Municipality	LV
Occitanie Region *	FR

\* = NEREUS members

INTERREGIONAL COOPERATION for TRANSFORMATIVE LEARNING AND CAPACITY BUILDING

#### What about Training and Education?

In the framework of its project activities, **Regione Basilicata will work on its 2021-2027 ROP (Regional Operative Plane) to test the training and capacity building program: "Introduction to Satellite Remote Sensing of Environment for Regional and Local Authorities".** 

The course will be **modular** and it is addressed to Regional and Local Authorities (RLAs) technicians and management staff interested/committed to evaluate the introduction of EO-SDI based solutions in their current or future institutional work, fostering the uptake and integration of EO/GI data and services in a broad range of application domains.

The training program will be developed with the following actions:

- Identification and selection of a relevant regional stakeholders group interested in improving the overall regional governance and administrative management of regional development policies through the use of satellite data;
- Identification of the tasks and possible benefits related to the uptake of satellite data in a specific regional policy;
- Design and implementation of a training and capacity building program;
- Verification and testing of the effectiveness of the program, assessing the benefits of using space technologies solutions over traditional techniques.

#### **Project timeframe**

Project will last 4 years and is divided into semesters:

- **6** semesters of "core phase";
- **2** semesters of "follow up phase".

#### 7 Learning Deep Dives:

- **1** per partner;
- **1** per semester, except for semester 5 when we will host 2.

#### Stakeholders involvement

- **13 Regional Stakeholders Groups meetings** to be organized at local level (2 per semester in core phase, 1 in the follow-up);
- **Rotating participation in LDDs**: 2 members of every RSG (travel and accommodation covered by the project);
- **1 Capacity Building Bootcamp**: immersive capacity-building session to provide individual and organizational competences to RSG members and RSG animators.
