- Erasmus+ skills capacity building: automotive & aerospace sector, a presentation by a Rolls Royce representative
- Moderated discussion (15 min)
- Discussion & QnA
- Closing

**About:** In recent years, the commercialization of space has emerged, with private companies driving innovation and exploration in the upstream as well as the downstream space sector. This paradigm shift brings about new challenges and opportunities for space education in Europe. This 11th information session aims to explore the readiness of European space education to embrace the commercialization of space. We will delve into key questions, such as Curriculum Adaptation; Industry Collaboration; Skill Development; Ethical Considerations.

**Target group:** Universities/research centres which are NEREUS-Associate members, Universities based in NEREUS-members regions, other Universities interested in education/training, cooperation partners, NEREUS-regions who hosted the EO4GEO workshops in the past, all NEREUS-members interested in the education/training regarding the use of space technologies;
