EDUCATION AND TRAINING IN THE SPACE SECTOR, NEW TRENDS, PARTNERSHIPS AND OPPORTUNITIES

Programme 13 November 2025 (moderated discussion with participating partners):

Introduction and moderation by Margarita Chrysaki, NEREUS
Communication & Project officer (5 min);

- “A new era. A new generation. The aerospace generation.” by Nils Waldmann, Office of the Aerospace Strategy of Baden-Württemberg – THE aerospace LÄND, Office hosted by Forum Luft- und Raumfahrt Baden-Württemberg e.V.
- Presentation by Campanian Aerospace Technology District TBC

Moderated discussion (15 min)

Discussion & QnA

Closing

About: The 19th edition of the NEREUS infosession on education and training in the space sector will focus on the next generation on how to inspire, engage, and empower children, teenagers, and young adults to pursue space-related careers.

Target group: Universities/research centres which are NEREUS-Associate members, Universities based in NEREUS-members regions, other Universities interested in education/training, cooperation partners, NEREUS-regions who hosted the EO4GEO workshops in the past, all NEREUS-members interested in the education/training regarding the use of space technologies;

EDUCATION AND TRAINING IN THE SPACE SECTOR, NEW TRENDS, PARTNERSHIPS AND OPPORTUNITIES

About: The 19th edition of the NEREUS infosession on education and training in the space sector will focus on the next generation on how to inspire, engage, and empower children, teenagers, and young adults to pursue space-related careers. Through presentations and discussion, the session will explore how youth across Europe connect with space through student initiatives, competitions, and educational programmes. It will highlight concrete examples from regional and national strategies that actively support young people's involvement in space, showcasing how regions can serve as enablers of innovation, curiosity, and long-term commitment to the space domain.

Based on insights of a field research conducted as part of a Master's thesis in European Ethnology at the University of Würzburg, which involved accompanying a student space association in Franconia, Bavaria region, and drawing from practical experience within the framework of the Aerospace Strategy of Baden-Württemberg region, the speaker will share perspectives on youth engagement in the space sector. As part of this strategy, collaboration with student associations such as KSat, HyEnD, and SeeSat has played a key role in supporting and showcasing student-led initiatives in aerospace. The speaker will provide a practical perspective on supporting youth through strategic initiatives, such as Mission Zukunft: On To New Horizons.

The session will conclude with a discussion on how to strengthen youth participation in the space ecosystem from early education and regional initiatives to European programmes underlining that while funding is vital, fostering purpose, mentorship, and community is what truly sustains.
